

GRIMM BROTHERS,
HÄTT ICH DICH, SO WOLLT ICH DICH!

The ten fairy tales chosen by Anne Buessow mostly refer to women and children. In the Grimm brothers' first edition, women are selfconfident, bold to their husbands, and children may not only appear as kind little beings. Indeed, some stories end with the death of all of the protagonists. In later editions, this type of fairy tale has been censured or totally erased. But in the original version, Hansens Trine escapes her daily trot and boredom, going out of her house into the world with pleasure.
